BOMA Addflex

**Install or replace dispensers
without tools.**

BOMA installs dispensers without damaging walls, using no adhesive or silicone. No drill holes! Thanks to the power of millions of suction cups, installation is completely damage-free and durable. Quieter, cleaner, and faster than traditional installation methods.

Exclusively available at BOMA

Services

simple. smart. fun.

BOMA takes care
of everything,
from A to Z

fun.

- 1. Advice:** BOMA advises you on selecting your dispensers, consumables and exchange services. You'll receive the solution that best suits your needs.
- 2. Installation:** BOMA installs your dispensers with its own specialized installation team. Carefully and fully tailored to your environment. Thanks to BOMA Addflex, we do this completely damage-free.
- 3. Maintenance:** You can count on properly functioning dispensers.
- 4. Support:** BOMA is always nearby. Your dedicated BOMA contacts monitor everything and are ready to quickly assist you with any questions or comments.
- 5. Monitoring:** BOMA monitors your consumption. You can view your usage and data digitally through our tools. Our goal is to give you full transparency in your own data.

Sustainability in every detail

At BOMA, hygiene and sustainability go hand in hand. Together with our partners, we strive to minimize emissions in everything we offer.

Our products: Innovation for your restrooms

We select our products based on circularity and efficiency, also for washroom areas.

1. Materials:

We combat irresponsible deforestation by using FSC-certified materials and EU Ecolabel-certified products, recycled paper, or bamboo paper.

2. Less waste:

Tabs reduce packaging waste and CO₂ emissions! These little powerhouses eliminate the need for unnecessary trips to transport water.

3. Smart logistics:

Consolidated freight flows and the BOMA Addflex system enable installations and repairs without additional transport movements.

Our exchange services: The greenest cleaning

Our changing services are designed to make textile management fully sustainable. We work with a specialised partner that achieves exceptionally low CO₂ emissions per kilogram of laundry.

- **Steam-free innovation:** Completely natural gas-free washing since 2012 enabled by advanced heat pumps.
- **Cool chemistry:** Textiles are cleaned at low temperatures using phosphate-free detergents. This saves energy without compromising hygiene.
- **Smart heat recovery** from water and air (WORM technology) reduces gas consumption by 70% for heating washing water and by 30% during drying.
- **High quality:** Our entrance mats are so durable that they require less frequent washing, helping to reduce the use of water, energy and raw materials.
- **Solar energy:** More than 266,476 kWh of green electricity is generated annually through solar panels.
