

Product information

DustBow microfibre cover

Characteristics

- suitable for all hard surfaces;
- high dust-collection capacity;
- fast and easily interchangeable;
- no displacement of dust.

Have you already discover the ease of the Greenspeed® [DustBow flexible dust remover](#)? This removes dust effectively from places that are difficult to reach. Regular use of the DustBow means collecting a lot of dust, so an extra microfibre cover will be of use.

This cover consists of 100% microfibre material, with a high electrostatic charge. This attracts dust and dirt to the surface. While cleaning, you can beat or vacuum the cover several times to remove dust. After completion of the cleaning task, the cover has to be laundered.

The accompanying DustBow holder is available separately.

Specifications
