

Product information

MiniDuster

Characteristics

- Effective removal of dust;
- No movement of dust;
- High dirt-absorption capacity.

Clean “dry” whatever may be cleaned dry! With the Greenspeed[®] MiniDuster you remove all dust fast and effectively. The dust is attracted and retained by the cotton fibres which are treated with special paraffin oil.

The MiniDuster removes dust without damage to surfaces. Combined with the [flexible coupling](#), both high and lower surfaces can easily be reached. Furthermore, the MiniDuster is ideal for use in combination with other, slightly damp microfibre products, for a clean and hygienic result

For large surfaces you may employ the [LargeDuster](#), while for difficult to access places, the [DustBow](#) or the [FoxDuster flexible cleaner](#) will be a good option.

Specifications

Colour	black/grey
Dimensions	30 x 12 cm
Composition	cotton fibres impregnated with special paraffin oil
Weight	± 130 grams
