

FABRIC
WASHING

PureSan Asepsis

Concentrated low temperature bleaching and hygiene additive

PROPERTIES

- Peracetic acid based bleaching active.
- Delivers excellent bleaching performance between 40°C and 75°C.
- Delivers anti-bacterial, anti-fungal, anti-viral hygiene benefits.
- The product can bleach effectively at 40 – 60°C for the different degrees of soiling.

INSTRUCTIONS FOR USE

Recommended dosage level:

0.7 ml PureSan Asepsis per l water (= 3.9 g/kg textile),
15 min at 60 °C or 10 min at 70°C (fabric to water 1 : 5).

COMPOSITION ACCORDING EC-DIRECTIVE

< 5% Phosphonates

> 30% Oxygen bleach

The classification and labelling of PureSan Asepsis is due to the presence of peracetic acid and hydrogen peroxide, which degrade into non-classified substances during the washing process.

PHYSICO-CHEMICAL PROPERTIES

- Density (20 °C): 1.1 g/ml
- pH-value (100%): 0.5

LEGISLATION

Chlorine free, i.e. no AOX contribution.

Readily biodegradable.

COD-value: 261.365 mg/kg.

SAFETY AND TRANSPORT

. GHS02 GHS05 GHS07 GHS09

UN 3109

Meets European Regulation on the classification, packaging and labelling of substances and mixtures.

Please refer to the Safety Data Sheet for safe use instructions

STORAGE

Use above 5°C. Store above -20°C and below 35°C.

PACKAGING

Canister	22 kg
Drum	220 kg
Container	1050 kg

NON WARRANTY

The suggestions and data in this bulletin are based on information we believe to be reliable. They are offered in good faith but without guarantee, as conditions and methods of use of our products are beyond our control. We recommend that the prospective user determines the suitability of our products on an experimental basis before adopting them in a real-life situation. Please contact our technical representatives for more information.
